

## **Risk Disclosure for Pure Market Africa**

*This document serves as a consolidated risk disclosure related to the services provided by Pure Market Africa, outlining the major potential risks associated with trading Over-The-Counter (OTC) Financial Instruments. Pure Market Africa is committed to taking all available and necessary measures to mitigate these risks; however, it is important to note that certain conditions and incidents may arise beyond the company's control, which cannot be predicted or avoided. By entering into a relationship with Pure Market Africa and utilizing its services, clients assume full responsibility and liability for their trading activities.*

*Trading OTC Financial Instruments involves a range of risks that clients should be aware of before engaging in such activities. While Pure Market Africa strives to provide a secure and reliable trading environment, it is essential for clients to understand the inherent risks involved. This risk disclosure aims to highlight the significant risks associated with trading on financial markets and emphasizes the client's responsibility in managing these risks effectively.*

*Pure Market Africa has implemented various risk management measures to safeguard clients' interests and promote a transparent trading environment. However, it is crucial to acknowledge that despite these measures, certain events or circumstances may occur that are beyond the company's control. Such incidents could have an impact on trading outcomes and may lead to financial losses.*

*By agreeing to the terms and conditions of the client agreement and availing themselves of Pure Market Africa's services, clients accept full responsibility for evaluating the risks, managing their financial resources, and implementing appropriate trading strategies. Clients should carefully consider their risk tolerance, financial capabilities, and investment objectives before engaging in trading activities on Pure Market Africa's platform.*

*This consolidated risk disclosure aims to provide clients with a comprehensive overview of the major risks associated with trading OTC Financial Instruments on Pure Market Africa. It is strongly recommended that clients read and understand this document thoroughly, seek independent financial advice if needed, and ensure compliance with all applicable laws and regulations. By proceeding with the trading activities, clients acknowledge their understanding of the risks involved and assume full responsibility and liability for their decisions and actions. Remember, trading on financial markets carries inherent risks, and it is essential to make informed decisions and exercise caution throughout the trading process.*

This document is a risk disclosure by Pure Market Africa, which provides the Pure Portal service to clients under the terms and conditions of the Client Agreement. The purpose of this document is to inform clients of the potential risks involved in trading on financial markets through Pure Market Africa.

### Effect of "Leverage"

When engaging in margin trading, clients must be aware that even small market movements can significantly impact their trading accounts due to the effect of leverage. It is important to understand that if the market trend goes against the client, there is a possibility of incurring a total loss of the initial margin and any additional funds deposited to maintain open positions. Clients are solely responsible for evaluating all risks, managing their financial resources, and implementing an appropriate trading strategy. It is highly recommended to maintain a Margin Level of no lower than 1,000% and utilize Stop Loss orders to limit potential losses.

### Highly Volatile Instruments

Many financial instruments traded on Pure Market Africa's platform exhibit wide ranges of intraday price movements. Clients must carefully consider the fact that trading such instruments carries both a high probability of profit and a risk of loss. It is important to assess the inherent volatility of these instruments and employ effective risk management strategies.

## Technical Risk

Clients assume the risk of financial loss caused by failures in information systems, communication networks, electronic platforms, and other technical systems.

When executing trading operations through the client terminal, clients must be aware of the potential financial loss resulting from the following:

- Failure of client hardware, software, or internet connection.
- Improper operation of client equipment.
- Incorrect settings in the client terminal.
- Delayed client terminal updates.
- Lack of awareness of the applicable rules described in the MetaTrader User Guide and the Help section.

Clients acknowledge that during peak load periods, there may be difficulties in establishing communication with the duty operator, especially during fast-paced market conditions, such as when key economic indicators are released.

## Abnormal Market Conditions

Clients should acknowledge that under abnormal market conditions, the execution time for client instructions may increase. Unforeseen circumstances or extreme market fluctuations may impact the efficiency and speed of order execution.

## Trading Platform

Clients should acknowledge that only one request or instruction is allowed in the queue at a time. Once a request or instruction is sent, any subsequent request or instruction will be ignored, and the "Order is locked" message will appear in the "Order" window.

Clients should acknowledge that the server for live accounts is the only reliable source of quoting information. The quote base in the client terminal should not be considered a reliable source, as connection issues may prevent some quotes from reaching the client terminal.

Clients should acknowledge that closing the window to place/modify/delete an order or open/close a position does not cancel the instruction or request sent to the server.

Clients assume the risk of executing unplanned transactions if they send another instruction before receiving the result from the previously sent instruction.

Clients should acknowledge that if an order has already been executed but they send an instruction to modify the level of a pending order, including the levels of Stop Loss and/or Take Profit orders, the only instruction that will be executed is the instruction to modify the Stop Loss and/or Take Profit levels on the position opened with that order.

## Communications

Clients assume the risk of any financial loss caused by not receiving notifications from the company.

Clients should acknowledge that unencrypted information transmitted by email is not protected from unauthorized access. Relevant information regarding communication security can be found at [www.puremarketbroker.com/about-us](http://www.puremarketbroker.com/about-us).

Clients agree that the company has the right to delete messages sent through internal mail 3 (three) days after being sent, even if the client has not received them yet.

Clients hold full responsibility for the safekeeping of information received from the company and assume the risk of any financial loss caused by unauthorized access to their trading account by a third party.

## Force Majeure

Clients assume all risks of financial loss caused by force majeure events, which are unforeseen and beyond the control of the company or the client.

## Statutory Prohibitions and Restrictions

Clients assume all financial and other risks associated with completing operations or actions on financial markets that are prohibited or restricted by the legislation of their country of residence. It is the client's responsibility to comply with all applicable laws and regulations.

Clients are advised to thoroughly review and understand the risks outlined in this document, seek independent financial advice if necessary, and familiarize themselves with the terms and conditions stated in the Client Agreement before engaging in trading activities on Pure Market Africa's platform.
